Independent Auditors' Report

The Board of Directors

OAo Scientific Production Corporation "Irkut"

We have audited the accompanying consolidated financial statements of OAo Scientific Production Corporation "Irkut" (the "Company") and its subsidiaries (the "Group"), which comprise the consolidated statement of financial position as at 31 December 2010, the consolidated income statement, the consolidated statements of comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Group as at 31 December 2010, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

1 Background

(a) Organisation and operations

OA0 Scientific Production Corporation "Irkut" ("the Company") was formed as an open joint stock company following the President Decree and State Privatization Programme of 1992. The principal activity of the Company is the construction of military and civil aircraft under contracts with Russian and foreign governments. The Company and its subsidiaries ("the Group") are also engaged in research and development works for military and civil aircraft. This research and development is carried out for the Group's own purposes.

In accordance with Russian legislation the supply of military equipment to foreign governments is the competence of the Russian government and, therefore, all contracts with foreign governments are concluded through the Russian state organization FGUP "Rosoboronexport" ("Rosoboronexport").

The Company's operations are subject to license for production and repair of aviation equipment awarded by FGUP "Rosaviacosmos". The current license is valid until January 2013.

The Company's office is located at bld. 1, 68, Leningradsky prospect, Moscow, 125315, Russia.

(b) State Secrets

The operations of the Group related to the construction and sale of military aircraft are subject to the Law of the Russian Federation on State Secrets signed by the President of the Russian Federation on 21 July 1993. This Law provides that the information on the foreign economic activities of the Russian Federation, disclosure of which can cause damage to the security of the country, is considered a state secret. Access to information classified as a state secret can be granted by the appropriate authorities only to organizations and individuals holding security licenses with the appropriate form of clearance. In addition, part of the property, plant and equipment of the Company makes up the mobilization capacity of the state (refer note 13(c)) and is also subject to the Law on State Secrets. The law also limits the authority of the Company to dispose of these assets.

(c) Russian business environment

The Russian Federation has been experiencing political and economic change that has affected, and may continue to affect, the activities of enterprises operating in this environment. Consequently, operations in the Russian Federation involve risks that typically do not exist in other markets. In addition, the contraction in the capital and credit markets has further increased the level of economic uncertainty in the environment. These consolidated financial statements reflect management's assessment of the impact of the Russian business environment on the operations and the financial position of the Group. The future business environment may differ from management's assessment.

2 Basis of preparation

(a) Statement of compliance

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRSs") and related interpretations adopted by the International Accounting Standards Board ("IASB").

(b) Basis of measurement

The consolidated financial statements are prepared on the historical cost basis except that investment property, instruments held for trading, designated at fair value through profit and loss and available-for-sale are stated at fair value.

(c) Functional and presentation currency

The national currency of the Russian Federation is the Russian Rouble ("RUB"). The Parent Company's functional currency is the United States Dollar ("USD") because it reflects the economic substance of the underlying events and circumstances of the company.

USD is also the currency in which the consolidated financial statements are presented. All financial information presented in USD has been rounded to the nearest thousand.

The RUB is not a readily convertible currency outside the Russian Federation and, accordingly, any conversion of RUB to USD should not be construed as a representation that the RUB amounts have been, could be, or will be in the future, convertible into USD at the exchange rate disclosed, or at any other exchange rate.

(d) Use of estimates and judgements

Management has made a number of estimates and assumptions relating to the reporting of assets and liabilities and the disclosure of contingent assets and liabilities to prepare these financial statements in conformity with IFRS. Actual results could differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgements in applying accounting policies are described in the following notes:

- Note 3(o) and 8 – Revenues;
- Note 4(c) and 16 – Investments and non-current financial assets;
- Note 14 – Intangible assets;
- Note 25 – Provisions;
- Note 28 – Contingencies.

(e) Changes in accounting policies

Beginning from 1 January 2010, the Group has early adopted exemptions stated in paragraph 25 of the revised IAS 24 Related Party Disclosures issued in November 2009 which becomes effective for annual periods beginning on or after 1 January 2011. The exemption applied relates to disclosure of operations and outstanding balances with the Federal Government of Russian Federation and government related entities.

3 Significant accounting policies

The following significant accounting policies have been applied in the preparation of the consolidated financial statements. These accounting policies have been consistently applied, except as explained in note 2(e) which addresses changes in accounting policies.

(a) Basis of consolidation

(i) *Accounting for business combinations*

All business combinations occurring on or after 1 January 2009 are accounted for by applying the acquisition method.

Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, the Group takes into consideration potential voting rights that currently are exercisable. The acquisition date is the date on which control is transferred to the acquirer. Judgement is applied in determining the acquisition date and determining whether control is transferred from one party to another.

The Group measures goodwill as the fair value of the consideration transferred including the recognised amount of any non-controlling interest in the acquiree, less the net recognised amount (generally fair value) of the identifiable assets acquired and liabilities assumed, all measured as of the acquisition date.

Consideration transferred includes the fair values of the assets transferred, liabilities incurred by the Group to the previous owners of the acquiree, and equity interests issued by the Group. Consideration transferred also includes the fair value of any contingent consideration and share-based payment awards of the acquiree that are replaced mandatorily in the business combination (see below). If a business combination results in the termination of pre-existing relationships between the Group and the acquiree, then the lower of the termination amount, as contained in the agreement, and the value of the off-market element is deducted from the consideration transferred and recognised in other expenses.

When share-based payment awards exchanged (replacement awards) for awards held by the acquiree's employees (acquiree's awards) relate to past services, then a part of the market-based measure of the awards replaced is included in the consideration transferred. If they require future services, then the difference between the amount included in consideration transferred and the market-based measure of the replacement awards is treated as post-combination compensation cost.

A contingent liability of the acquiree is assumed in a business combination only if such a liability represents a present obligation and arises from a past event, and its fair value can be measured reliably.

The Group measures any non-controlling interest at its proportionate interest in the identifiable net assets of the acquiree.

Transaction costs that the Group incurs in connection with a business combination, such as finder's fees, legal fees, due diligence fees, and other professional and consulting fees are expensed as incurred.

(ii) *Subsidiaries*

Subsidiaries are entities controlled by the Group. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. The accounting policies of subsidiaries have been changed when necessary to align them with the policies adopted by the Group.

Acquisitions of non-controlling interests are accounted for as transactions with equity holders in their capacity as equity holders and therefore no goodwill is recognised as a result of such transactions.

(iii) *Associates and jointly controlled entities (equity accounted investees)*

Associates are those entities in which the Group has significant influence, but not control, over the financial and operating policies. Significant influence is presumed to exist when the Group holds between 20 and 50% of the voting power of another entity.

Joint ventures are those entities over whose activities the Group has joint control, established by contractual agreement and requiring unanimous consent for strategic financial and operating decisions.

Associates and jointly controlled entities are accounted for using the equity method (equity accounted investees) and are recognised initially at cost. The Group's investment includes goodwill identified on acquisition, net of any accumulated impairment losses. The consolidated financial statements include the Group's share of the income and expenses and equity movements of equity accounted investees, after adjustments to align the accounting policies with those of the Group, from the date that significant influence or joint control commences until the date that significant influence or joint control ceases. When the Group's share of losses exceeds its interest in an equity accounted investee, the carrying amount of that interest (including any long-term investments) is reduced to nil and the recognition of further losses is discontinued except to the extent that the Group has an obligation or has made payments on behalf of the investee.

(iv) *Transactions eliminated on consolidation*

Intragroup balances and transactions, and any unrealised gains arising from intragroup transactions, are eliminated in preparing the consolidated financial statements. Unrealised gains arising from transactions with associates and jointly controlled enterprises are eliminated to the extent of the Group's interest in the enterprise. Unrealised gains resulting from transactions with associates are eliminated against the investment in the associate. Unrealised losses are eliminated in the same way as unrealised gains except that they are only eliminated to the extent that there is no evidence of impairment.

(b) *Foreign currency transactions*

Transactions in foreign currencies are translated to the respective functional currencies of Group entities at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated to the functional currency at the exchange rate at the date that the fair value was determined. Foreign currency differences arising on retranslation are recognised in profit or loss, except for differences arising on the retranslation of available-for-sale equity instruments.

(c) Operations for which functional currency is different from functional currency of the Company

For subsidiaries whose functional currency is different from the functional currency of the Company, the assets and liabilities of such operations, including goodwill and fair value adjustments arising on acquisition, are translated into USD at exchange rates at the reporting date. The income and expenses of these operations are translated into USD at exchange rates at the dates of the transactions.

Foreign currency differences are recognised in other comprehensive income in the foreign currency translation reserve. When an operation is disposed of, in part or in full, the relevant amount in the foreign currency translation reserve is transferred to profit or loss.

Foreign exchange gains and losses arising from a monetary item receivable from or payable to a such operations, the settlement of which is neither planned nor likely in the foreseeable future, are considered to form part of a net investment in the operation and are recognised directly in equity in the foreign currency translation reserve.

(d) Classification of assets and liabilities

The operating cycle for aircraft construction contracts exceeds one year. Assets, which are reasonably expected to be realised in cash or sold or consumed during the operating cycle of the business are shown under current assets. Liabilities whose liquidation is reasonably expected within the operating cycle of the business are also shown under current liabilities.

(e) Property, plant and equipment

(i) Recognition and measurement

Items of property, plant and equipment, except for land, are measured at cost less accumulated depreciation and impairment losses.

Cost includes expenditures that are directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the asset to a working condition for its intended use, and the costs of dismantling and removing the items and restoring the site on which they are located. Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment. Furthermore, borrowing costs that are directly attributable to the acquisition, construction or production of qualifying assets are capitalised as part of the cost of the asset.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

(ii) Subsequent costs

The cost of replacing part of an item of property, plant and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Group and its cost can be measured reliably. The costs of the day-to-day servicing of property, plant and equipment are recognised in profit or loss as incurred.

(iii) Depreciation

Depreciation is determined using straight-line method based on the estimated useful lives of the individual assets and is recognised in profit or loss.

Depreciation commences on the date of acquisition or, in respect of internally constructed assets, from the time an asset is completed and ready for use. Land is not depreciated. Leased assets are depreciated over the period of useful life which is determined in line with one applied to similar owned assets.

The estimated useful lives for the current and comparative periods are as follows:

- Buildings 40-50 years
- Plant and equipment 5-20 years

(iv) *Leased assets*

Leases in terms of which the Group assumes substantially all the risks and rewards of ownership are classified as finance leases. Upon initial recognition the leased asset is measured at an amount equal to the lower of its fair value and the present value of the minimum lease payments. Subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset.

Other leases are operating leases and the leased assets are not recognised on the Group's statement of financial position.

(f) *Intangible Assets*

(i) *Research and development*

Expenditure on research activities, undertaken with the prospect of gaining new scientific or technical knowledge and understanding, is recognised in the income statement as an expense as incurred.

Expenditure on development activities, whereby research findings are applied to a plan or design for the production of new or substantially improved products and processes, other than development carried out as part of construction contracts (refer accounting policy 3(o)), is capitalised if the product or process is technically and commercially feasible and the Group has sufficient resources to complete development. The expenditure capitalised includes the cost of materials, direct labour, an appropriate proportion of overheads and borrowing costs that are directly attributable to the development activity. Other development expenditure is recognised in the consolidated income statement as an expense as incurred.

Capitalised development expenditure is stated at cost less accumulated amortisation and impairment losses. Amortisation is charged to the income statement over the estimated units to be produced. The carrying amount is reviewed for impairment annually when the asset is not yet in use and thereafter whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

(ii) *Other intangible assets*

Other intangible assets are recorded at cost less accumulated amortisation and/or impairment losses. Intangible assets that have limited useful lives are amortised on a straight-line basis over the estimated useful lives of the individual assets, which are in the range of 3-5 years. Intangible assets with indefinite useful lives are not amortised but are instead tested for impairment at least annually.

(g) Negative goodwill

Negative goodwill arising on an acquisition represents the excess of the fair value of the net identifiable assets acquired over the cost of acquisition. Negative goodwill is recognised immediately in the consolidated income statement.

(h) Financial instruments

(i) *Non-derivative financial instruments*

Non-derivative financial instruments comprise investments in equity and debt securities, trade and other receivables, cash and cash equivalents, loans and borrowings, and trade and other payables.

Non-derivative financial instruments are recognised initially at fair value plus, for instruments not at fair value through profit or loss, any directly attributable transaction costs, except as described below. Subsequent to initial recognition non-derivative financial instruments are measured as described below.

A financial instrument is recognised if the Group becomes a party to the contractual provisions of the instrument. Financial assets are derecognised if the Group's contractual rights to the cash flows from the financial assets expire or if the Group transfers the financial asset to another party without retaining control or substantially all risks and rewards of the asset. Regular way purchases and sales of financial assets are accounted for at trade date, i.e., the date that the Group commits itself to purchase or sell the asset. Financial liabilities are derecognised if the Group's obligations specified in the contract expire or are discharged or cancelled.

Cash and cash equivalents comprise cash balances and call deposits. Bank overdrafts that are repayable on demand and form an integral part of the Group's cash management are included as a component of cash and cash equivalents for the purpose of the consolidated statement of cash flows.

Accounting for finance income and costs is discussed in note 3(q).

Held-to-maturity investments

If the Group has the positive intent and ability to hold debt securities to maturity, then they are classified as held-to-maturity. Held-to-maturity investments are measured at amortised cost using the effective interest method, less any impairment losses.

Available-for-sale financial assets

The Group's investments in equity securities and certain debt securities are classified as available-for-sale financial assets. Subsequent to initial recognition, they are measured at fair value and changes therein, other than impairment losses (see note 3(k)(i)), and foreign exchange gains and losses on available-for-sale monetary items (see note 3(b)), are recognised directly in equity. When an investment is derecognised, the cumulative gain or loss in equity is transferred to profit or loss.

Investments in equity securities that are not quoted on a stock exchange and where fair value cannot be estimated on a reasonable basis by other means are stated at cost less impairment losses.

Investments at fair value through profit or loss

An instrument is classified as at fair value through profit or loss if it is held for trading or is designated as such upon initial recognition. Financial instruments are designated at fair value through profit or loss if the Group manages such investments and makes purchase and sale decisions based on their fair value. Upon initial recognition, attributable transaction costs are

recognised in profit or loss when incurred. Financial instruments at fair value through profit or loss are measured at fair value, and changes therein are recognised in profit or loss.

Derivative financial instruments, including hedge accounting

The Group holds derivative financial instruments to hedge its foreign currency exposures.

On initial designation of the derivative as the hedging instrument, the Group formally documents the relationship between the hedging instrument and hedged item, including the risk management objectives and strategy in undertaking the hedge transaction and the hedged risk, together with the methods that will be used to assess the effectiveness of the hedging relationship. The Group makes an assessment, both at the inception of the hedge relationship as well as on an ongoing basis, of whether the hedging instruments are expected to be "highly effective" in offsetting the changes in the fair value or cash flows of the respective hedged items during the period for which the hedge is designated, and whether the actual results of each hedge are within a range of 80-125 percent. For a cash flow hedge of a forecast transaction, the transaction should be highly probable to occur and should present an exposure to variations in cash flows that could ultimately affect reported net income.

Derivatives are recognised initially at fair value; attributable transaction costs are recognised in profit or loss as incurred. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are accounted for as described below.

Cash flow hedges

When a derivative is designated as the hedging instrument in a hedge of the variability in cash flows attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction that could affect profit or loss, the effective portion of changes in the fair value of the derivative is recognised in other comprehensive income and presented in the hedging reserve in equity. The amount recognised in other comprehensive income is removed and included in profit or loss in the same period as the hedged cash flows affect profit or loss under the same line item in the statement of comprehensive income as the hedged item. Any ineffective portion of changes in the fair value of the derivative is recognized immediately in profit or loss.

If the hedging instrument no longer meets the criteria for hedge accounting, expires or is sold, terminated, exercised, or the designation is revoked, then hedge accounting is discontinued prospectively. The cumulative gain or loss previously recognised in other comprehensive income and presented in the hedging reserve in equity remains there until the forecast transaction affects profit or loss. When the hedged item is a non-financial asset, the amount recognised in other comprehensive income is transferred to the carrying amount of the asset when the asset is recognised. If the forecast transaction is no longer expected to occur, then the balance in other comprehensive income is recognised immediately in profit or loss. In other cases the amount recognised in other comprehensive income is transferred to profit or loss in the same period that the hedged item affects profit or loss.

(i) Financial guarantees

Where the Company enters into financial guarantee contracts to guarantee the indebtedness of its supplies or affiliates, the Company considers these to be insurance arrangements, and accounts for them as such. In this respect, the Company treats the guarantee contract as a contingent liability until such time as it becomes probable that the Company will be required to make a payment under the guarantee.

(j) Inventories

Construction work in progress is stated at cost plus profit recognised to date less foreseeable losses and less progress billings. Cost includes all expenditure related directly to specific projects and an allocation of fixed and variable overheads incurred in the Group's contract activities based on normal operating capacity.

Other inventories are stated at the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

The cost of inventories is based on the average cost principle and includes expenditure incurred in acquiring the inventories and bringing them to their existing location and condition. In the case of manufactured inventories and work in progress, cost includes an appropriate share of overheads based on normal operating capacity.

Inventories are presented in the consolidated statement of financial position net of advance payments received for construction contracts.

(k) Impairment

(i) *Financial assets*

A financial asset is considered to be impaired if objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of that asset.

An impairment loss in respect of a financial asset measured at amortised cost is calculated as the difference between its carrying amount, and the present value of the estimated future cash flows discounted at the original effective interest rate. An impairment loss in respect of an available-for-sale financial asset is calculated by reference to its current fair value.

Individually significant financial assets are tested for impairment on an individual basis. The remaining financial assets are assessed collectively in groups that share similar credit risk characteristics.

All impairment losses are recognised in profit or loss. Any cumulative loss in respect of an available-for-sale financial asset recognised previously in equity is transferred to profit or loss.

(ii) *Non-financial assets*

The carrying amounts of the Group's non-financial assets, other than investment property, inventories and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the asset's recoverable amount is estimated.

An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. A cash-generating unit is the smallest identifiable asset group that generates cash flows that largely are independent from other assets and groups. Impairment losses are recognised in profit or loss. Impairment losses recognised in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amount of the other assets in the unit (group of units) on a pro rata basis.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed where there is an indication that the impairment loss may no longer exist and there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

(l) Dividends

Dividends are recognised as a liability in the period in which they are declared.

(m) Employee benefits

Employees receive pension benefits from the government of the Russian Federation and the Group makes contributions on their behalf in accordance with the appropriate laws and regulations which are expensed as incurred.

(n) Provisions

A provision is recognised in the consolidated statement of financial position when the Group has a legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

A provision for estimated standard warranty costs is recognised in the period in which the related product sales occur. An accrual for warranty costs is recognised based on the Group's historical experience on previous deliveries of aircrafts. Estimates are adjusted as necessary based on subsequent experience.

(o) Revenues

The operations of the Group principally consist of building aircraft under fixed-price contracts. Revenues under such contracts are recognised on a percentage of completion basis, measured by the ratio of total direct materials, labour and contract related design and development costs incurred to date relative to the total estimated respective costs on the contract. This method is used as the management of the Group considers this to be the best available measure of progress on the contracts. Marketing costs that are incurred for a specific contract may be included in contract costs, but only if these costs can be directly associated with a specific contract and if their recoverability from that contract is probable.

Provisions for estimated losses on uncompleted contracts, if any, are made in the period in which such losses are determined. Changes in job performance, contract conditions and estimated profitability, including those arising from contract penalty provisions, if any, and final contract settlements may result in revisions to costs and income and are recognised in the period in which the revisions are determined.

Revenue from the sale of goods is recognised in the income statement when the significant risks and rewards of ownership have been transferred to the buyer.

Revenue from services rendered is recognised in profit or loss in proportion to the stage of completion of the transaction at the reporting date.

(p) Other expenses

(i) Operating leases

Payments made under operating leases are recognised in profit or loss on a straight-line basis over the term of the lease. Lease incentives received are recognised as an integral part of the total lease expense, over the term of the lease.

(ii) Social expenditure

To the extent that the Group's contributions to social programs benefit the community at large and are not restricted to the Group's employees, they are recognised in profit or loss as incurred.

(q) Finance income and costs

Finance income comprises interest income on funds invested, dividend income, gains on the disposal of available-for-sale financial assets, changes in the fair value of financial assets at fair value through profit or loss, and foreign currency gains. Interest income is recognised as it accrues, using the effective interest method. Dividend income is recognised on the date that the Group's right to receive payment is established.

Finance costs comprise interest expense on borrowings, unwinding of the discount on provisions, foreign currency losses, changes in the fair value of financial assets at fair value through profit or loss, and impairment losses recognised on financial assets. All borrowing costs, which are not directly attributable to the qualifying assets, are recognised in profit or loss using the effective interest method, except for borrowing costs directly attributable to the acquisition, construction or production of qualifying assets which are recognized as part of the cost of such assets.

Foreign currency gains and losses are reported on a net basis.

(r) Income tax

Income tax for the year comprises current and deferred tax. Income tax is recognised in the income statement except to the extent that it relates to items recognised directly to equity, in which case it is recognised in equity.

Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is provided using the balance sheet liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences are not provided for: goodwill; initial recognition of assets or liabilities that affect neither accounting nor taxable profit; and investments in subsidiaries where the Parent Company is able to control the timing of the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the reporting date.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

(s) Government grants

Government grants are recognised in the balance sheet initially as deferred income when there is reasonable assurance that it will be received and that the Group will comply with the conditions attaching to it. Government grants that compensate the Group for expenses incurred are recognised in the income statement on a systematic basis in the same periods in which the expenses were incurred. Grants that compensate the Group for the cost of an asset are deducted from the carrying amounts of the asset.

(t) Earnings per share

The Group presents basic and diluted earnings per share (EPS) information for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Parent Company by the weighted average number of ordinary shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares, which comprise convertible notes and share options granted to employees.

(u) Segment reporting

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components. All operating segments' operating results are reviewed regularly by the Group's CEO to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial is available.

(v) New Standards and Interpretations not yet adopted

Other than those adopted early as explained in note 2(e), a number of new Standards, amendments to Standards and Interpretations are not yet effective as at 31 December 2010, and have not been applied in preparing these consolidated financial statements. None of these will have an impact on the Group's financial reporting.

4 Determination of fair values

A number of the Group's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and / or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

(a) Property, plant and equipment

The fair value of property, plant and equipment recognised as a result of a business combination is based on market values. The market value of property is the estimated amount for which a property could be exchanged on the date of valuation between a willing buyer and a willing seller in an arm's length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. The market value of items of plant, equipment, fixtures and fittings is based on the quoted market prices for similar items.

(b) Intangible assets

The fair value of intellectual property rights and patents acquired in a business combination is based on the discounted estimated royalty payments that have been avoided as a result of the intellectual property rights or patent being owned. The fair value of other intangible assets is based on the discounted cash flows expected to be derived from the use and eventual sale of the assets.

(c) Investments in equity and debt securities

The fair value of financial assets at fair value through profit or loss, held-to-maturity investments and available-for-sale financial assets is determined by reference to their quoted bid price at the reporting date. If the market for an investment is not active, the fair value is determined by reference to the observable market transactions with the same or comparable instrument or by using a valuation technique. The fair value of held-to-maturity investments is determined for disclosure purposes only.

(d) Trade and other receivables

The fair value of trade and other receivables, excluding construction work in progress, is estimated as the present value of future cash flows, discounted at the market rate of interest at the reporting date.

(e) Non-derivative financial liabilities

Fair value, which is determined for disclosure purposes, is calculated based on the present value of future principal and interest cash flows, discounted at the market rate of interest at the reporting date. In respect of the liability component of convertible notes, the market rate of interest is determined by reference to similar liabilities that do not have a conversion option. For finance leases the market rate of interest is determined by reference to similar lease agreements.

5 Financial risk management

(a) Overview

The Group has exposure to the following risks from its use of financial instruments:

- credit risk
- liquidity risk
- market risk.

This note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risk, and the Group's management of capital. Further quantitative disclosures are included throughout these consolidated financial statements.

The Board of Directors has overall responsibility for the establishment and oversight of the Group's risk management framework. The Board has established a Risk Management Commission, which is responsible for developing and monitoring the Group's risk management policies. The commission reports regularly to the Board of Directors on its activities.

The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management standards and

procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

(b) Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from customers and investment securities.

(i) Trade and other receivables

Main customers of the Group are governments of other countries and the Group's exposure to credit risk is influenced mainly by the economical and political situation in these countries. Approximately 90% of the Group's revenue is attributable to sales transactions with a group of three main customers. Therefore, geographically there is high concentration of credit risk. The Group monitors all changes which occur in the target countries.

The Group establishes an allowance for impairment that represents its estimate of incurred losses in respect of trade and other receivables and investments. The main components of this allowance are a specific loss component that relates to individually significant exposures.

Credit evaluations are performed on all customers, other than related parties, requiring credit over a certain amount.

(ii) Investments

The Group limits its exposure to credit risk by only investing in liquid securities and related entities.

(iii) Guarantees

As of 31 December 2010 the Group did not have any contractual commitments to extend financial guarantees, credit or other assistance.

(c) Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

Typically the Group ensures that it has sufficient cash on demand to meet expected operational expenses for a period of 15-30 days, including the servicing of financial obligations; this excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters. In addition, the Group maintains the following lines of credit, which were undrawn as at 31 December 2010:

- USD 12 million short-term credit line that is secured by future cash receipts under existing contract Interest would be payable at the fixed rate of 8.5%;
- USD 75 million long-term credit line that is unsecured. Interest would be payable at the fixed rate of 6.3%;
- USD 20 million short-term credit line that is unsecured. Interest would be payable at the fixed rate of 6.25%;
- USD 14 million long-term credit line that is unsecured. Interest would be payable at the fixed rate of 8%;

(d) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

The Group incurs financial liabilities, in order to manage market risks. All such transactions are carried out within the guidelines set by the Risk Management Commission. Generally the Group seeks to apply hedge accounting in order to manage volatility in profit or loss.

(i) Currency risk

The Group is exposed to currency risk on sales, purchases and borrowings that are denominated in a currency other than the respective functional currencies of Group entities, primarily U.S. Dollars (USD) but also the euro (EURO), and Russian Roubles (RUB). The currencies in which these transactions primarily are denominated are USD, EURO and RUB. Interest on borrowings is generally denominated in currencies that match the cash flows generated by the underlying operations of the Group, primarily USD, but also RUB and EURO. This provides an economic hedge and no derivatives are entered into, except for the following:

In 2010 the Group issued three-year rouble bonds and hedged those using foreign currency exchange forward contracts. This hedge is accounted as cash flow hedge and the effective part of hedging recognised directly in hedging reserve in other comprehensive income net of related tax.

In respect of other monetary assets and liabilities denominated in foreign currencies, the Group ensures that its net exposure is kept to an acceptable level by buying or selling foreign currencies at spot rates when necessary to address short-term imbalances.

(ii) Interest rate risk

Management does not have a formal policy of determining how much of the Group's exposure should be to fixed or variable rates. However, at the time of issuing new debt management uses its judgment to decide whether it believes that a fixed or variable rate would be more favourable to the Group over the expected period until maturity.

(iii) Operational risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Group's processes, personnel, technology and infrastructure, and from external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards of corporate behaviour. Operational risks arise from all of the Group's operations.

The Group's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to the Group's reputation with overall cost effectiveness and to avoid control procedures that restrict initiative and creativity.

The primary responsibility for the development and implementation of controls to address operational risk is assigned to senior management within each business unit. This responsibility is supported by the development of overall Group standards for the management of operational risk in the following areas:

- requirements for appropriate segregation of duties, including the independent authorisation of transactions
- requirements for the reconciliation and monitoring of transactions

- compliance with regulatory and other legal requirements
- documentation of controls and procedures
- requirements for the periodic assessment of operational risks faced, and the adequacy of controls and procedures to address the risks identified
- requirements for the reporting of operational losses and proposed remedial action
- development of contingency plans
- training and professional development
- ethical and business standards
- risk mitigation, including insurance where this is effective.

(iv) **Capital management**

Management's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. Management monitors the return on capital. Management seeks to maintain a balance between the higher returns that might be possible with higher levels of borrowings and the advantages and security afforded by a sound capital position.

The Group's return on capital was 14.5% in 2010 (2009: negative). The weighted average interest expense on interest-bearing borrowings (excluding liabilities with imputed interest and excluding effect of government grants related to interest expense) was 8.43% (2009: 8.2%).

The Group's debt to adjusted capital ratio at the end of the reporting period was as follows:

	2010	2009
	'000 USD	'000 USD
Total debt	1,012,351	1,239,524
Less: cash and cash equivalents	(320,434)	(535,096)
Net debt	<u>691,917</u>	<u>704,428</u>
Total equity	<u>588,786</u>	<u>346,197</u>
Debt to capital ratio at 31 December	<u>1.18</u>	<u>2.03</u>

There were no changes in the Group's approach to capital management during the year.

Neither the Company nor any of its subsidiaries are subject to externally imposed capital requirements.

6 Operating segments

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components. An operating segment's operating results are reviewed regularly by the CEO to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available.

Segment results that are reported to the CEO include items directly attributable to a segment as well as those that can be allocated on a reasonable basis. Unallocated items comprise fixed assets, administrative expenses, and income tax assets and liabilities.

Segment capital expenditure is the total cost incurred during the period to acquire property, plant and equipment, and intangible assets other than goodwill.

The Group has four reportable segments, as described below, which are the Group's strategic business programs. The strategic business programs offer different products and complied services, and are managed separately because they require different technology and marketing strategies. For each of the strategic business programs, the Group's CEO reviews internal management reports on a half-yearly basis. The following summary describes the operations in each of the Group's reportable segments:

- *SU-30 Program.* Includes development, manufacturing and distributing SU-30 aircrafts, components and service equipment.
- *YAK-130 Program.* Includes development, manufacturing and distribution of YAK-130 aircrafts components and service equipment.
- *Cooperation.* Includes products which are developed and manufactured in cooperation with Airbus.
- *MC-21 Program.* Includes development of a new civil aircraft with silicon wing.

Other operations include repair and modernization of aircrafts sold in the past but not currently produced, supply of utilities, design and development work under contract with client and other. None of these segments meets any of the quantitative thresholds for determining reportable segments in 2010 or 2009.

The underlying principles on which the reportable segments information are generally derived from the statutory accounting records adjusted for management reporting purposes. The major reconciling differences between the information provided to CEO and the related IFRS-based amounts relate to:

- Timing differences related to when revenue and costs are recognised.
- Differences related to allocation of types of expenses to cost of sales and distribution cost.
- Differences related to design and development costs and subsequent amortisation of such costs.

Information regarding the results of each reportable segment is included below. Segment performance is measured based on segment gross profit calculated as revenue after deduction of the direct cost of production and directly attributable distribution expenses. Segment profit is used to measure performance as management believes that such information is the most relevant in evaluating the results of certain segments relative to other entities that operate within these industries.

Notes to the Consolidated Financial Statements for the year ended 31 December 2010

Reconciliation of reportable segments' revenues and reportable segments' measure of profit:

	2010	2009
	'000 USD	'000 USD
Total revenue for reportable segments	1,635,942	1,275,593
Difference in timing of revenue recognition	36,708	38,058
Consolidated revenue	<u>1,672,650</u>	<u>1,313,651</u>
Reportable segment gross profit	526,778	421,287
Direct distribution expenses	269,066	155,150
Difference in timing of recognition and presentation	(101,962)	(171,358)
Gross profit	693,882	405,079
Other income	1,013	1,384
Research and development costs	(11,274)	(9,686)
Distribution expenses	(247,221)	(181,047)
Administrative expenses	(127,523)	(123,921)
Taxes, other than on profit	(9,646)	(8,242)
Other expenses	(137,478)	(30,350)
Profit from operating activities	161,753	53,217
Finance income	14,331	11,837
Finance costs	(59,344)	(85,080)
Share of loss of equity accounted investees	(13,493)	(9,541)
Consolidated profit/(loss) before income tax	<u>103,247</u>	<u>(29,567)</u>

7 Other non-current assets

Other non-current assets include a number of SU-30K military aircraft acquired as trade-in by the Group in 2008. Management initially anticipated resale of aircraft in 2009. Due to the nature of the asset, management is limited in marketing efforts and there is high uncertainty regarding timing and amount of proceeds until negotiations with potential customers are finalised.

As at 31 December 2009 and 31 December 2010, the carrying value of the asset before recognition of impairment losses exceeded the recoverable amount by USD 12,200 thousand and USD 89,986 thousand, respectively. The recoverable amount is based on the state and progress of negotiations with specific customers as at the reporting date and reflects management assessment of the most likely scenario of the future sale in 2013 (2009: in 2011). Future proceeds are discounted using pre-tax discount rate of 17%, which reflects management's assessments of uncertainties relating to the expected sale as well as the time value of money. As at the reporting date, the carrying amount of the aircraft is USD 100,580 thousand net of accumulated impairment losses of USD 89,986 thousand (2009: USD 178,366 thousand net of accumulated impairment losses of USD 12,200 thousand).

8 Revenues

	2010	2009
	'000 USD	'000 USD
Revenue earned on military aircraft construction contracts	1,152,183	874,699
Revenue on sales of military aircraft components and related products	283,729	326,775
Revenue earned on civil aircraft construction contracts	12,536	-
Revenue on sales of civil aircraft components and related products	22,733	7,764
Provision of services on research and development	148,561	59,495
Other revenues	52,908	44,918
	1,672,650	1,313,651

The aggregate amount of costs incurred and recognised profits (less recognised losses) to date on construction contracts in progress is USD 3,019,345 thousand (2009: USD 3,602,383 thousand).

9 Personnel expenses

	2010	2009
	'000 USD	'000 USD
Wages and salaries	202,574	183,832
Compulsory social security contributions	42,829	37,432
	245,403	221,264

10 Other expenses

	2010	2009
	'000 USD	'000 USD
Impairment of other non-current assets (Note 7)	(77,786)	(12,200)
Impairment of capitalised development cost (Note 14)	(37,316)	-
Loss on disposal of property, plant and equipment and assets held for sale	(1,365)	-
Loss on disposal of current assets	-	(725)
Social costs	(9,772)	(6,533)
Impairment of loans given and receivables	(1,700)	(2,014)
Banking charges	(1,698)	(1,111)
Other	(7,841)	(7,767)
	(137,478)	(30,350)

11 Finance income and costs

	2010	2009
	'000 USD	'000 USD
<i>Finance income</i>		
Interest income	12,032	9,423
Gain on disposal of investments	-	2,414
Foreign exchange gain	2,299	-
	14,331	11,837

	<u>17,701</u>	<u>17</u>	<u>(10,182)</u>	<u>(35)</u>

(a) Unrecognised tax losses

Recognition of previously unrecognised tax losses is attributable to government grants related to compensation of interest paid in 2007-2009. In the past the Company treated these amounts as taxable income. During 2009-2010 the Company won an arbitrary dispute with tax authorities in relation to tax treatment of such grants. Based on this the Company revised its tax returns for the years 2008-2009 which resulted in additional tax loss for the year 2009 and which was immediately utilised to reduce taxable profit in 2010 (Note 28(b)). Starting from 2010 the legislation in relation to treatment of interest compensation has been changed and it is considered taxable income.

(b) Change in recognised deferred tax assets

At the end of 2010 Russian tax legislation relating to foreign exchange differences on advances from customers (to suppliers) changed. As a result of this change deferred tax assets relating to exchange differences became irrecoverable and this balance has been written off.

13 Property, plant and equipment

(a) Leased plant and machinery

The Group leases production equipment under a number of finance lease agreements. The leased equipment secures lease obligations (see Note 23). At 31 December 2010 the net carrying amount of leased plant and machinery was USD 37,653 thousand (2009: USD 46,200 thousand).

(b) Security

At 31 December 2010 properties with a carrying amount of USD 10,885 thousand (31 December 2009: USD 14,648 thousand) are pledged as a collateral for secured bank loans (see Note 23).

(c) Other restrictions

The net book value of property, plant and equipment restricted for sale by the Russian government in accordance with the state military programme amounted to USD 97,624 thousand (2009: USD 86,804 thousand).

At 31 December 2010	(47,005)	(11,841)	(58,846)
<i>Net book value</i>			
At 1 January 2009	135,658	13,888	149,546
At 31 December 2009	147,649	12,199	159,848
At 31 December 2010	171,856	10,764	182,620

Capitalised development costs comprise the following items:

	2010	2009
	'000 USD	'000 USD
Intellectual property rights related to the development of:		
Be-200 aircraft	-	34,823
Yak-130 aircraft	135,858	100,961
SUV-30K modernisation set	6,772	9,265
MC-21	26,086	-
Others	3,140	2,600
	171,856	147,649

Provision of services to customers under SUV-30K programs will commence in 2013 and therefore the related intangible asset is not amortised. Instead, management tested this asset for impairment as at 31 December 2010. The recoverable amount determined as discounted future cash flows from the continuing use of the asset exceeds the carrying amount of related intangible asset as at 31 December 2010 therefore an impairment loss was recognised in amount of USD 2,493 thousand (see also Note 7).

While preparing these financial statements management reconsidered the future sales of Be-200 aircraft. As a result of this reassessment, the carrying amount of related capitalised development costs was written off as fully impaired.

Management monitors the MC-21 development program against the capitalization criteria required by IAS 38 *Intangible Assets* on an ongoing basis. During 2010 the program entered into a phase when development activities required the Company to incur particular costs that are only expected to be recovered through future sales of aircraft. Taking into account other factors management concluded that the criteria for capitalisation commencement were collectively met during reporting period. Commercial sales are expected to commence in 2016 and therefore the related intangible asset is not amortised. As a result of the impairment test the carrying amount of related capitalised development costs did not exceed its recoverable amount as at 31 December 2010.

15 Investments in equity accounted investees

At the end of 2009, as part of the UAC restructuring program, management decided to dispose of its total 41% ownership interest in JSC "TANTK imeni Berieva" and 22% ownership interest in JSC "NAZ "Sokol", and, accordingly, as at 31 December 2009 the investments were classified as assets held for sale.

In December 2010, the UAC restructuring program was postponed and the investments in JSC "TANTK imeni Berieva" and in JSC "NAZ "Sokol", were reclassified back to investments in associates. However, due to the fact JSC "TANTK imeni Berieva" and JSC "NAZ "Sokol" reported a net loss which resulted in negative net assets of these entities as at 31 December 2010, the carrying value of the investments was reduced to nil. The Group did not recognise any share in losses of JSC "TANTK imeni Berieva" and JSC "NAZ "Sokol" in addition to reducing the carrying value of investments to nil since the Group has no obligations in respect of these losses.

OAO Scientific Production Corporation "Irkut"
Notes to the Consolidated Financial Statements for the year ended 31 December 2010

'000 USD	Ownership	Total assets	Total liabilities	Revenues	Loss

21 Equity

(a) Share capital

In June 2010 the general meeting of shareholders decided on issuance of 187,877,473 ordinary shares at a nominal price of RUB 3 per share (2009: nil). Out of these 187,876,820 shares were subsequently purchased by parent company in November 2010 through partial conversion of the zero-interest loan received from the parent company earlier in March 2010 and other shareholders purchased 653 shares for the net consideration of USD 147,899 thousand.

As at 31 December 2010 authorised, issued and fully paid capital stock consisted of 1,166,009,085 ordinary shares. All ordinary shares have a nominal value of RUB 3 each.

(b) Additional paid-in capital

The increase in additional paid-in capital in the amount of USD 24,358 thousand represents a fair value adjustment relating to a zero-interest loan received from the parent company (see Note 23).

(c) Dividends and dividend limitations

Profits available for distribution to ordinary shareholders in respect of any reporting period are determined by reference to the statutory financial statements of the Parent Company prepared in accordance with the laws of the Russian Federation and denominated in Russian roubles. At 31 December 2010 the Parent Company had cumulative retained earnings, including the profit for the current year, of RUB 8,523,891 thousand (USD 279,684 thousand translated at the closing RUB/USD exchange rate of 30.4769).

On 26 April 2011 Board of Directors of the Company recommended to the General Shareholders Meeting to distribute dividends in amount of RUB 443,083 thousand (which represents USD 14,538 thousand at the exchange rate as of 31 December 2010) out of profits for the year 2010.

The following dividends have been declared at the Company's annual shareholders' meetings and paid:

	<u>24 June 2010</u>	<u>23 June 2009</u>
Amount per share, RUB	0.45	-
Amount per share, USD	0.0144	-
Total amount, '000 USD	14,110	-

22 Earnings per share

The calculation of earnings per share is the net profit for the year attributable to shareholders of the parent company divided by the weighted average number of ordinary shares outstanding during the year, calculated as shown below. The Group has no dilutive potential ordinary shares.

Number of shares	2010	2009
Issued ordinary shares at 1 January	978,131,612	978,131,612
Effect of ordinary shares issued in November	15,656,456	-
Weighted average number of ordinary shares at 31 December	993,788,068	978,131,612

23 Loans and borrowings

This note provides information about the contractual terms of the Group's loans and borrowings, which are measured at amortised cost. For more information about the Group's exposure to interest rate, foreign currency and liquidity risk, see note 26.

	2010 '000 USD	2009 '000 USD

	332,621	753,260

In December 2010 the Company received a zero-interest loan from parent company in the amount of USD 55,452 thousand (RUB 1,690 million) maturing in 2020. The loan was provided as a part of the program of financial support to companies in the aircraft industry by the Government of the Russian Federation. The present value of the loan calculated as the amount payable in 10 years discounted at 8.3% (average borrowing rate of the Company on comparable loans) was USD 25,004 thousand at the date of receipt and was classified as a loan from parent company in non-current borrowings. The fair value adjustment in respect of the loan in the amount of USD 24,358 thousand, net of related income tax effect of USD 6,090 thousand, was recognized directly in equity.

(a) Security

The loans are secured over property, plant and equipment with a carrying amount of USD 10,885 thousand (31 December 2009: USD 14,648 thousand) and the right to receive future revenues under an agreement with a foreign government.

Other loans	0%-5%	2010-2020	41,388	41,597	-	-
Total interest-bearing liabilities			1,008,209	1,012,351	1,233,167	1,239,524

(c) Finance lease liabilities are payable as follows:

'000 USD	Future minimum lease payments 2010	Interest 2010	Present value of minimum lease payments 2010	Future minimum lease payments 2009	Interest 2009	Present value of minimum lease payments 2009
Less than one year	10,947	2,386	8,561	12,656	1,187	11,469
Between one and five years	9,620	3,720	5,900	8,355	401	7,954
	20,567	6,106	14,461	21,011	1,588	19,423

For more information about the Group's exposure to interest rate and foreign currency risk, see note 26.

24 Trade and other payables

	2010 <u>'000 USD</u>	2009 <u>'000 USD</u>
Accounts payable	151,316	152,407
Accrued expenses	10,539	6,153
Advances from customers	117,346	92,180
Income tax payable	185	29
Other taxes payable	7,510	16,727
Other payables	18,453	13,870
	<u>305,349</u>	<u>281,366</u>

The Group's exposure to currency and liquidity risk related to trade and other payables is disclosed in note 26.

25 Provisions

	Warranties	
	2010 <u>'000 USD</u>	2009 <u>'000 USD</u>
Balance at 1 January	7,032	9,194
Provisions made during the year	15,850	8,127
Provisions used during the year	(12,173)	(8,448)
Provisions reversed during the year	-	(1,841)
Balance at 31 December	<u>10,709</u>	<u>7,032</u>

The Group provides product warranties in conjunction with certain product sales. Generally, aircraft sales are accompanied by a twelve to eighteen month warranty period that covers systems, accessories, equipment, parts and software manufactured by the Group to certain contractual specifications. Warranty coverage includes non-conformance to specifications and defects in material and workmanship.

The warranty liability recorded at each reporting date reflects the estimated number of months of warranty coverage outstanding for products produced times the expected monthly warranty payments, as well as additional amounts, if necessary, for certain major warranty issues that exceed a normal claims level.

26 Financial instruments

Exposure to credit, interest rate and currency risk arises in the normal course of the Group's business.

(a) Credit risk

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was:

'000 USD	Carrying Amount 2010	Carrying amount 2009
Available-for-sale financial assets	17,983	27,282
Held-to-maturity investments	33,127	183
Other non-current financial assets	101	77
Trade receivables	126,212	117,359
Amounts due from customers for contract work	282,800	260,012
Loans to related parties	-	10,208
Loans to third parties	2,144	201
Other receivables and originated loans	40,752	20,941
Cash and cash equivalents	320,434	535,096
	823,553	971,359

(b) Impairment losses

The aging of trade receivables at the reporting date was:

'000 USD	Gross 2010	Impairment 2010	Gross 2009	Impairment 2009
Not past due	104,609	-	95,033	-
Past due 0-360 days	21,603	-	22,326	-
More than one year	584	(584)	37	(37)
	126,796	(584)	117,396	(37)

The movement in the allowance for impairment in respect of trade receivables during the year was as follows:

'000 USD	2010 '000 USD	2009 '000 USD
Balance at 1 January	37	137
Impairment loss recognised/(reversed)	547	(100)
Balance at 31 December	584	37

Based on historic default rates, the Group believes that no impairment allowance is necessary in respect of trade receivables not past due or past due by up to 360 days.

The allowance accounts in respect of trade receivables and held-to-maturity investments are used to record impairment losses unless the Group is satisfied that no recovery of the amount owing is possible; at that point the amounts considered irrecoverable and is written off against the financial asset directly. At 31 December 2010 the Group does not have any collective impairment on its trade receivables or its held-to-maturity investments (2009: nil).

OAo Scientific Production Corporation "Irkut"
Notes to the Consolidated Financial Statements for the year ended 31 December 2010

(c) Liquidity risk

The following are the contractual maturities of financial liabilities, including estimated interest payments and excluding the impact of netting agreements:

31 December 2010

'000 USD	Carrying amount	Contractual cash flows	12 month or less	1-2 years	3-5 years	Later
Secured bank loans	369,957	400,862	178,546	222,316	-	-
Unsecured bank loans	417,830	482,425	187,871	292,154	2,400	-
Unsecured bond issue	168,506	209,460	15,134	194,326	-	-
Finance lease liabilities	14,461	20,567	10,947	2,590	6,681	349
Other loans	41,597	72,176	16,724	-	-	55,452
Trade and other payables	188,003	188,003	188,003	-	-	-
	1,200,354	1,373,493	597,225	711,386	9,081	55,801

31 December 2009

'000 USD	Carrying amount	Contractual cash flows	12 month or less	1-2 years	3-5 years	Later
Secured bank loans	437,383	485,458	328,601	156,643	214	-
Unsecured bank loans	672,872	788,508	388,359	222,853	177,296	-
Unsecured bond issue	109,846	116,748	116,748	-	-	-

	1,428,710	1,600,911	1,035,550	387,851	177,510	-

(d) Currency risk

The Group's exposure to foreign currency risk was as follows based on notional amounts:

'000 USD	31 December 2010			31 December 2009		
	USD	RUB	EURO	USD	RUB	EURO
Cash and cash equivalents	131,271	188,834	329	163,629	370,001	1,466
Trade receivables	60,533	65,679	-	91,883	25,443	33
Other receivables and originated loans	-	40,752	-	-	20,941	-
Amounts due from customers for contract work	260,984	21,816	-	225,630	34,382	-
Secured bank loans	(343,898)	(23,899)	(2,160)	(410,258)	(22,213)	(4,912)
Unsecured bank loans	(391,120)	-	(26,710)	(672,433)	-	(439)
Unsecured bond issue	-	(168,506)	-	-	(109,846)	-
Finance lease liabilities	(13,087)	(1,200)	(174)	(13,137)	(2,568)	(3,718)
Other loans	-	(41,597)	-	-	-	-
Trade and other payables	(98,247)	(82,199)	(7,557)	(117,192)	(60,552)	(11,442)
Gross exposure	(393,564)	(320)	(36,272)	(731,878)	255,588	(19,012)
Forward exchange contracts (Note 5(d(i)))	(165,458)	168,506	-	-	-	-
Net exposure	(559,022)	168,186	(36,272)	(731,878)	255,588	(19,012)

OAQ Scientific Production Corporation "Irkut"
Notes to the Consolidated Financial Statements for the year ended 31 December 2010

The following significant exchange rates applied during the year:

USD	Average rate		Reporting date spot rate	
	2010	2009	2010	2009
RUB 1,000	32.93	31.53	32.81	33.07
EURO	1.33	1.39	1.32	1.43

(e) Sensitivity analysis

A 5% strengthening of the USD against the following currencies at 31 December 2010 would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant. The analysis is performed on the same basis for 2009

'000 USD	<u>Equity/Profit or loss</u>
31 December 2010	
RUB	8,009
EURO	(1,728)
31 December 2009	
RUB	(12,171)
EURO	905

A 5% weakening of the USD against the above currencies at 31 December 2010 would have had the equal but opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remain constant.

(f) Interest rate risk

(i) Profile

At the reporting date the interest rate profile of the Group's interest-bearing financial instruments was:

'000 USD	Carrying amount	
	2010	2009
Fixed rate instruments		
Financial assets	222,112	368,747
Financial liabilities	(920,208)	(716,453)
	<u>(698,096)</u>	<u>(347,706)</u>
Variable rate instruments		
Financial liabilities	(67,139)	(523,071)
	<u>(67,139)</u>	<u>(523,071)</u>

(ii) Fair value sensitivity analysis for fixed rate instruments

The Group does not recognize any fixed rate financial assets and liabilities at fair value through profit or loss, and the Group does not designate derivatives as hedging instruments under a fair value hedge accounting model. Therefore a change in interest rates at the reporting date would not affect equity or net profit for the year.

(iii) Cash flow sensitivity analysis for variable rate instruments

An increase of 100 basis points in interest rates based on the Group's exposure at the balance sheet date for 2010 would have increased loss for the year by USD 671 thousand (2009: USD 5,231 thousand). The analysis assumes that all other variables, in particular foreign currency rates, remain constant.

(g) Fair values

(i) Fair values versus carrying amounts

The fair values of financial assets and liabilities, together with the carrying amounts shown in the balance sheet, are as follows:

'000 USD	<u>Carrying amount 2010</u>	<u>Fair value 2010</u>	<u>Carrying amount 2009</u>	<u>Fair value 2009</u>
Available-for-sale financial assets	17,983	17,983	27,282	27,282
Other non-current financial assets	101	101	77	77
Held-to-maturity investments	33,127	33,127	183	183
Loans and receivables	169,108	169,108	148,709	148,709
Cash and cash equivalents	320,434	320,434	535,096	535,096
Secured bank loans	(369,957)	(369,957)	(437,383)	(437,383)
Unsecured bank loans	(417,830)	(417,830)	(672,872)	(672,872)
Unsecured bond issue, RUB (note 23)	(168,506)	(165,814)	(109,846)	(106,384)
Finance lease liabilities	(14,461)	(14,461)	(19,423)	(19,423)
Other loans	(41,597)	(41,597)	-	-
Trade and other payables	(188,003)	(188,003)	(189,186)	(189,186)
	<u>(659,601)</u>	<u>(656,909)</u>	<u>(717,363)</u>	<u>(713,901)</u>

The basis for determining fair values is disclosed in note 4.

27 Commitments

(a) Capital commitments

At 31 December 2010 the Group is committed to capital expenditure of approximately USD 2,569 thousand (2008: USD 1,453 thousand).

(b) Supply commitments

Commitments with third parties for the supply of aircraft components and services after 31 December 2010 under long-term supply agreements are estimated at USD 169,621 thousand at current market prices (2009: USD 260,756 thousand).

28 Contingencies

(a) Insurance

The insurance industry in the Russian Federation is in a developing state and many forms of insurance protection common in other parts of the world are not yet generally available. The Group does not have full coverage for its plant facilities, business interruption, or third party liability in respect of property or environmental damage arising from accidents on Group property or relating to Group operations. Until the Group obtains adequate insurance coverage, there is a risk that the loss or destruction of certain assets could have a material adverse effect on the Group's operations and financial position.

(b) Taxation contingencies

The taxation system in the Russian Federation is relatively new and is characterised by frequent changes in legislation, official pronouncements and court decisions, which are often unclear, contradictory and subject to varying interpretation by different tax authorities. Taxes are subject to review and investigation by a number of authorities, which have the authority to impose severe fines, penalties and interest charges. A tax year remains open for review by the tax authorities during the three subsequent calendar years; however, under certain circumstances a tax year may remain open longer. Recent events within the Russian Federation suggest that the tax authorities are taking a more assertive position in their interpretation and enforcement of tax legislation.

These circumstances may create tax risks in the Russian Federation that are substantially more significant than in other countries. Management believes that it has provided adequately for tax liabilities based on its interpretations of applicable Russian tax legislation, official pronouncements and court decisions. However, the interpretations of the relevant authorities could differ and the effect on these consolidated financial statements, if the authorities were successful in enforcing their interpretations, could be significant.

(c) Environmental contingencies

Governmental authorities are continually considering environmental regulations and their enforcement and the Group periodically evaluates its obligations related thereto. As obligations are determined, they are recognised immediately. The outcome of environmental liabilities under proposed or any future legislation, or as a result of stricter enforcement of existing legislation, cannot reasonably be estimated. Under current levels of enforcement of existing legislation, management believes there are no liabilities, which will have a materially adverse effect on the financial position or the operating results of the Group.

29 Related party transactions

(a) Control relationship

Related parties comprise the shareholders of the Parent Company and all other companies in which those shareholders, either individually or together, have a controlling interest.

Upon establishment of OAO United Aircraft Corporation in December 2006, the controlling interest in the Parent Company was contributed by the shareholders to the share capital of OAO United Aircraft Corporation, which is controlled by the Federal Government of Russian Federation. Therefore, from 31 December 2006 the Federal Government of Russian Federation is the ultimate controlling party of the Group. Related parties disclosures (refer 29(c)) as at 31 December 2010 include balances with other government related entities.

(b) Transactions with management

(i) Key management personnel compensation

Key management received the following remuneration during the year, which is included in personnel expenses (see note 9):

	2010	2009
	'000 USD	'000 USD
Wages and salaries	8,396	7,781
Compulsory social security contributions	256	358
	8,652	8,139

(c) Transactions with government related entities

The Group is indirectly owned by the Federal Government of Russian Federation (93.6%). The Group operates in the industry dominated by entities directly or indirectly controlled by the Federal Government of Russian Federation through its government authorities, agencies, affiliation and other organizations (collectively referred to as "government related entities"). The Group has transactions with other government related entities including but not limited to sales and purchases of goods and ancillary materials, rendering and receiving services, lease of assets, depositing and borrowing money, and use of public utilities.

These transactions are conducted in the ordinary course of the Group's business on terms comparable to those with other entities that are not government related. The Group has established procurement policies, pricing strategy and approval process for purchases and sales of products and services, which are independent of whether the counterparties are government-related entities or not.

In March 2010, the Company received a zero-interest loan in the amount of USD 159,886 thousand (see Note 23) from the parent company OAO United Aircraft Corporation, which has been partially converted in the amount of USD 149,730 thousand into equity instruments of the Company. The loan was converted into 187,876,820 ordinary shares of the Company which comprised the partial subscription for the share issue approved by the shareholders of the Company in June 2010 (see Note 21).

In December 2010 the Company received a zero-interest loan in the amount of USD 55,452 thousand maturing in 2020 from the parent company OAO United Aircraft Corporation as a compensation of interest paid as a part of the program of financial support provided to companies in the aircraft industry by the Government of the Russian Federation (see Note 23).

During the year ended 31 December 2010 the Group did not enter into other individually significant transactions with government related entities.

For the year ended 31 December 2010, management estimates that the aggregate amount of the Group's collectively significant transactions with government related entities is up to 10% (2009: up to 40%) of its revenues, at least 32% (2009: at least 31%) of its purchases of materials, equipment and services, and up to 90% of its borrowings (2009: up to 90%).

The Group also benefits from compensation of borrowing costs related to financing of long-term construction contract from the government of Russian Federation. This government grant was provided following the Regulation of the Government of Russian Federation #357 dated 6 June 2005 which provides for partial compensation of borrowing costs incurred by Russian entities engaged in export of industrial products and which obtain financing from Russian banks. Management expects that the Group will continue to qualify for further compensation during 2011 in relation to loans already secured or to be secured in 2008-2011.

30 Significant subsidiaries

	Country of incorporation	Ownership/voting	
		2010	2009
ОАО "ОКБ Имени А.С. Яковлева"	Russia	75%	75%
ЗАО "Beta Air"	Russia	72%	72%
ЗАО "Techserviceavia"	Russia	51%	51%

In addition, the Group has other subsidiaries, which are not material to the Group, either individually or in aggregate.

31 Events subsequent to the reporting date

The Government of Russian Federation continues provide financial support to companies in the aircraft industry. On 14 March 2011 Group received a loan from parent company in amount of USD 380,666 thousand (RUB 11,600 million) maturing in 2020 and bearing an interest of 8%. The interest charge will be compensated by the parent company in the form of zero interest loans that are subsequently expected to be converted into equity of the Company.
